

STEP 1: PLANNING FOR SQUARE ONE

Planning for Square One is based on configuring 12"x24" and 24"x24" blocks in nearly any manner to create space dividing walls, coves, work zones, and more within open environments.

Idea Starters/Typicals:

When you select one of our pre-configured Typicals, everything you need comes specified together, including the blocks, caps and posts, hardware, glides, and more.

- Select the typical number (e.g., 17-4), then specify the finish and hardware color.
- Add optional accessories (see Step #5).

Make Your Own Typicals:

There are endless opportunities with Square One, giving you the ability to create unique setups to meet the specific needs of your customers.

- We recommend utilizing our Specification/Drawing Services team, who can help in bringing your vision to life and ensure all the necessary components are included. To get started, just send us a drawing. You can use our easy online request form: [Design Request Form](#)
- Steps #2 - #5 outline the process for specifying your own typical. Please provide a drawing with the order to ensure accuracy.

STEP 2: SPECIFYING BLOCKS

When making your own typical, choose the quantity of blocks needed to create your design. We offer single blocks in two styles: 24"x24" and 12"x24".

- Blocks can go up to four high (8') and do runs of five wide (10') without a supporting wall or anchor to create stability.
- We recommend using single 12" x 24" blocks on the top or ends. If placing on the bottom or in the center of the design, using two of them together will ensure alignment with the holes bored on attachment items like End Caps, Corner Posts, etc.
- When creating an "L" or "T" design, we suggest going a minimum of three blocks wide to ensure stability without additional support.

STEP 3: CAPS, POSTS, CONNECTORS, AND SPANNERS

Next, determine what Caps, Posts, Connectors, and Spanners are needed to complete the design.

- End and Top Caps are necessary to ensure a clean and balanced aesthetic (as they hide the attachment hardware/ensure no empty holes are showing where attachments would have been).
- Square One offers connection beams to create 90° turns (Corner Posts), three walls (T-Connectors), four walls (X-Connectors), and span doorways or other openings (Horizontal Beam Spanners).
- End Caps, Posts, and Connectors should always be specified to run longer (taller) than the unit so that the end of the top cap or horizontal rail will not be seen (there are only a few exceptions).

STEP 4: HARDWARE, LEVELING, AND GENERAL ASSEMBLY

Whether connecting square to square or square to post, individual components come with the necessary hardware. Should you need more, we offer separate Bolt Kits to provide proper installation.

We offer heavy-duty, adjustable leveling glides to compensate for uneven floors. A tool (6mm allen driver bit) is also available to insert the glide nuts. The glides must be ordered separately from the blocks.

We do not offer connection methods to anchor to the floor or wall. We recommend discussing this with the building's facility manager for proper connection. Indiana Furniture will not be liable for wall or floor mounts that are not properly installed.

Assembly Instructions may be found on our website.

STEP 5: ACCESSORIES

Add function without sacrificing beauty. Acrylic Inserts, Tackable and Acoustical Panels, Dry Erase Boards, and TV mounts can give your space the ability for more privacy, collaboration, or brainstorming.

- Dry Erase Boards and Tackable Panels have onset installation.
- Dry Erase Boards can be mounted either vertically or horizontally.
- Acoustical Panels are either specified onset or inset, and Acrylic Inserts are inset.
- Tackable Panels are fully upholstered, so a clean aesthetic is seen from both sides of the blocks.
- Acrylic Inserts lock into insert retainers which are installed on top of the hardware, inside of the block, allowing for a quick and tight-fitting installation.
- Frosted Acrylic Inserts can be customized with a logo or image, giving you freedom to create a personal touch. Provide a .CDR, .AI, or .EPS file. Extended lead times may apply.
- We offer the Vesta Power Data Center and other similar items to add power within your Square One spaces created.

**Space Division.
Redefined.**

17-1 (Approximately 10' X 10' X 8')

17-2 (Approximately 8' X 8' X 8')

17-3 (Approximately 12' X 8' X 8')

17-4 (Approximately 10' X 8' X 8')

17-5 (Approximately 16' X 16' X 8')

17-6 (Approximately 8' X 8' X 8')

17-7 (Approximately 8' X 8')

17-8 (Approximately 12' X 8' X 8')

17-9 (Approximately 12' X 8' X 6')

17-10 (Approximately 4' X 8' X 8')

17-11 (Approximately 4' X 4' X 8')

17-12 (Approximately 2' X 4' X 8')

17-13 (Approximately 8' X 8' X 8')

17-14 (Approximately 8' X 6' X 8')

17-15 (Approximately 10' X 10' X 8')

Space Division. Redefined.

Square One is the clean, simple way to provide space division, functionality, and architectural design to any zone within the working environment. With individual building blocks that securely connect to one another and accessories like dry erase boards, barn doors, planter boxes, acrylic inserts, and tackable and acoustical panels, your personalization of Square One is only limited to your imagination. Square One is made of solid wood, providing a sustainable material for the workplace and bringing warmth and beauty to any space.

CONSTRUCTION

BLOCKS

- Blocks are manufactured using kiln-dried, solid European Beech and are attached using hardware, available in your choice of nickel or black, for durability and strength

FINISH

- Indiana Furniture uses a multi-step hand finishing process
- Blocks are pre-sanded for smoothness, then stained and finished with a catalyzed varnish finish which offers durability, lasting beauty, and resistance to normal wear
- Square One finishes were selected to complement casegoods, tables, and seating finishes which allows for easy blending of furniture components

END & TOP CAPS

- Measure 1¾"W and 1¾"D and come in a variety of lengths
- Used vertically and horizontally to provide a clean, balanced aesthetic by hiding the attachment hardware
- Caps are constructed of kiln-dried, solid European Beech and include blind threaded inserts for installation

CORNER POSTS

- Measure 1¾"W and 1¾"D and come in a variety of heights
- Used to create 90° turns
- Corner posts are constructed of kiln-dried, solid European Beech and include blind threaded inserts for installation

T-CONNECTORS

- Measure 1¾"W and 1¾"D and come in a variety of heights
- Used vertically and horizontally to create an intersection for three wall runs
- T-Connectors are constructed of kiln-dried, solid European Beech and include blind threaded inserts for installation

X-CONNECTORS

- Measure 1¾"W and 1¾"D and come in a variety of heights
- Used vertically to create an intersection for four wall runs
- X-Connectors are constructed of kiln-dried, solid European Beech and include blind threaded inserts for installation

HORIZONTAL BEAM SPANNERS

- Measure 1¾"D and 1¾"H and come in a variety of widths
- Used horizontally to provide structural support for doorways and other designed openings
- Spanners are constructed of kiln-dried, solid European Beech and include blind threaded inserts for installation

DRY ERASE BOARDS

- Available in 22½" or 46½" heights and multiple widths
- Installed onset, either vertically or horizontally
- Installation brackets are included; longer bolts for installation on-site are also included

ACOUSTICAL PANELS

- Constructed of 100% polyester made from up to 50% recycled materials without the use of adhesive or other bonding agents, Acoustical Panels are 100% recyclable
- Panels are ½" (12mm) thick and are available in multiple widths and lengths
- Sound absorption is average NRC 0.75 (50mm air gap) 1.0 NRC in mid-high frequencies
- Panels are installed inset with tabs or onset with dual-lock connectors

TACKABLE PANELS

- Tackable Panels are constructed of 7/16" corkboard and then covered, on both sides, in the textile of your choice
- Highly-skilled upholsterers hand tailor each unit to meet individual specifications
- Upholstery options include a broad range of styles, all pre-graded in this price list for ease of use
- Panels are installed onset with dual-lock connectors

ACRYLIC INSERTS

- Acrylic inserts are manufactured using high performance engineering resins and provide translucency, strength, clarity, and versatility
- Inserts are 20½"W and are available in 8½" and 20½" lengths
- Inserts are inset within the blocks with retainers for a tight-fitting installation
- Frosted acrylic options can be customized with logos and other designs as requested

LEVELING GLIDES

- Heavy-duty, adjustable leveling glides are available in black or nickel and are recommended to ensure proper leveling and compensation for uneven floors
- A tool (6mm allen driver bit) to install glides is also available to ensure proper installation

BARN DOOR HARDWARE

- Sliding system tracks are constructed of black powder coated steel
- Hardware includes tracks, hangers, track stops, screws, inserts, bracket, and sliding system
- Installation hardware will be shipped attached to components

PLANTER BOXES

- The planter box is made of ¾" thick thermally-fused laminate (TFL) fused particle-board core
- Grain direction runs horizontal
- Planter boxes are fastened together with screws and heavy-duty metal fasteners
- Optional insert is made of lightweight, fade-resistant, recyclable plastic
